1. What the accountant does

The accountant sets school fees, raises invoices, receives payments and prints receipts, records expenses and other income, follows up debtors, keeps the cash book and produces financial reports. You only see the **Accounting** pages.

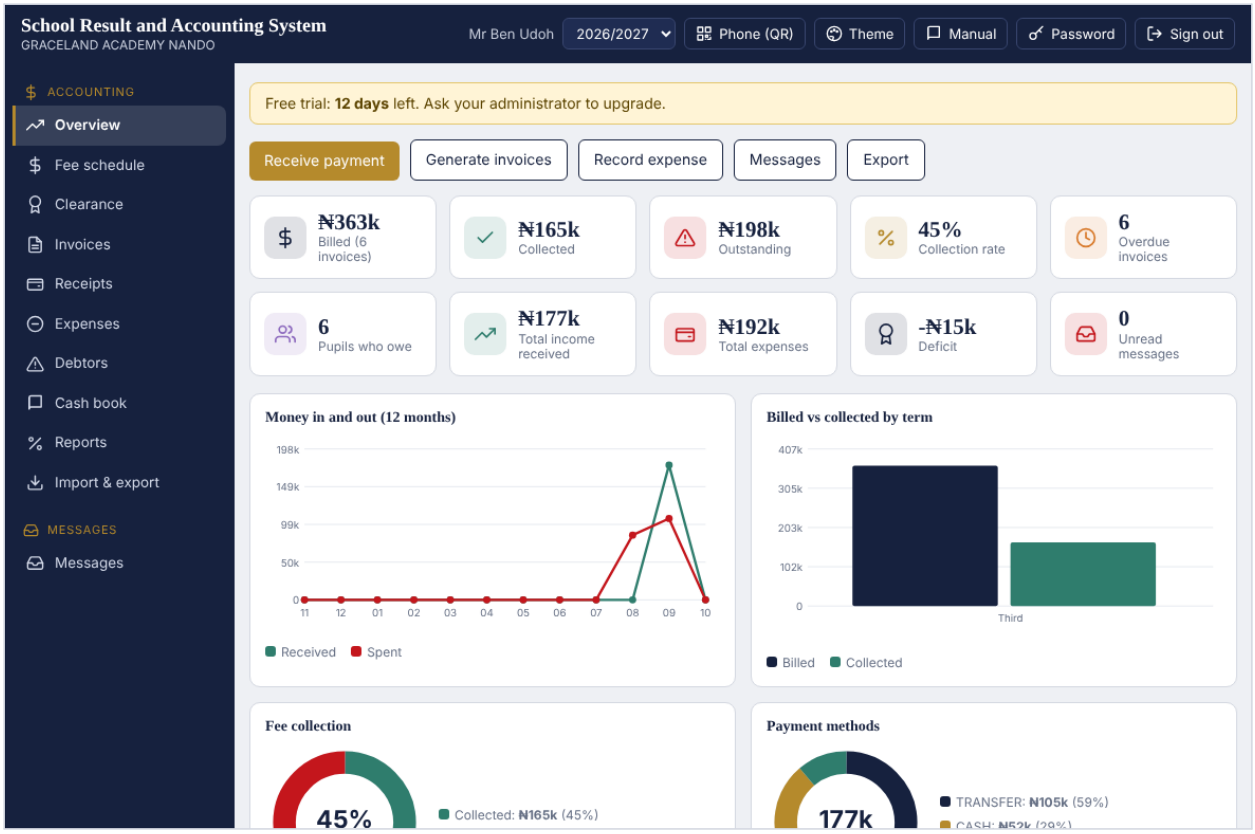

Signing in

1. Open the address given by your school (for example **http://192.168.1.10:8080**) in any browser on the school network.
2. Type your username and password and press **Sign in**.
3. Use the **Password** button at the top to change your password, and **Sign out** when you finish.
4. The **User manual (PDF)** button downloads this guide again.

2. Overview

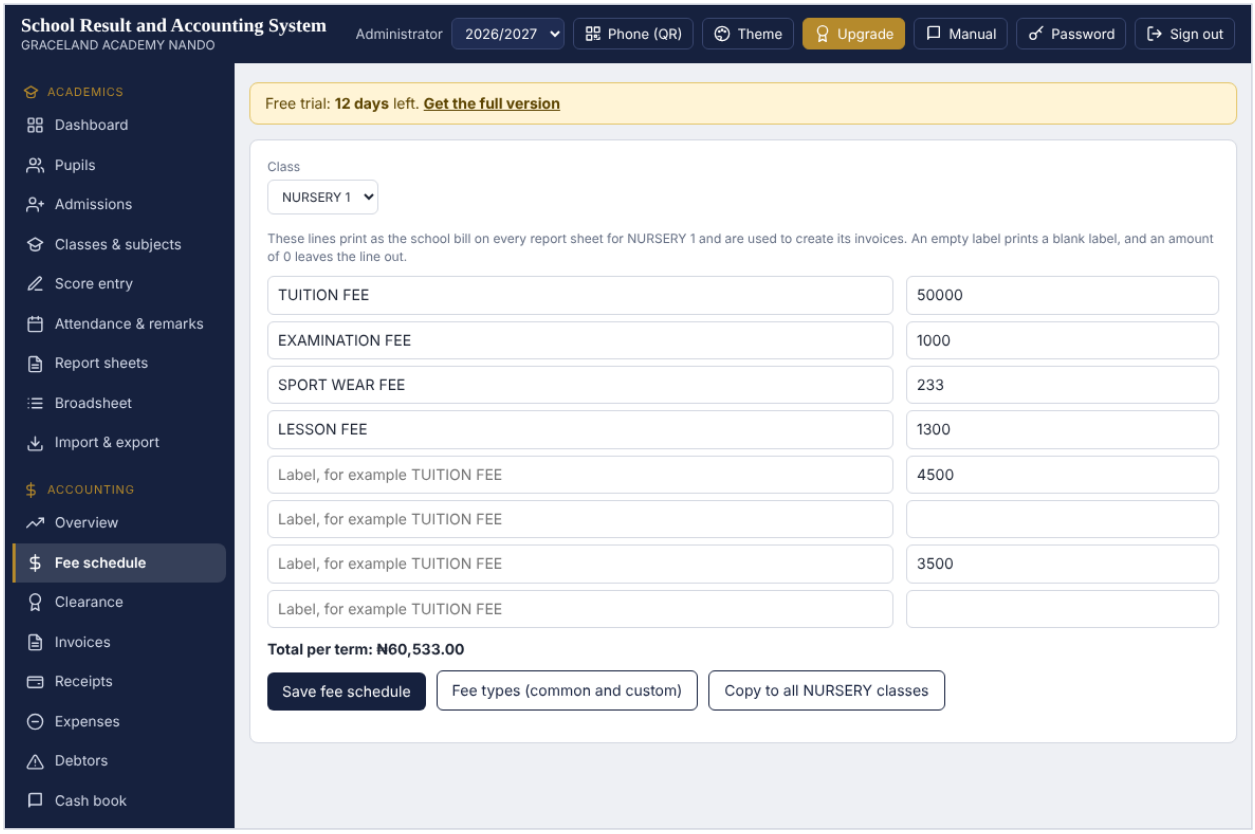

The overview shows the amount billed, collected and outstanding for the session or a chosen term, your cash and bank balances, this month's money in and out, and the latest receipts.

Accountant overview.

3. Fee schedule

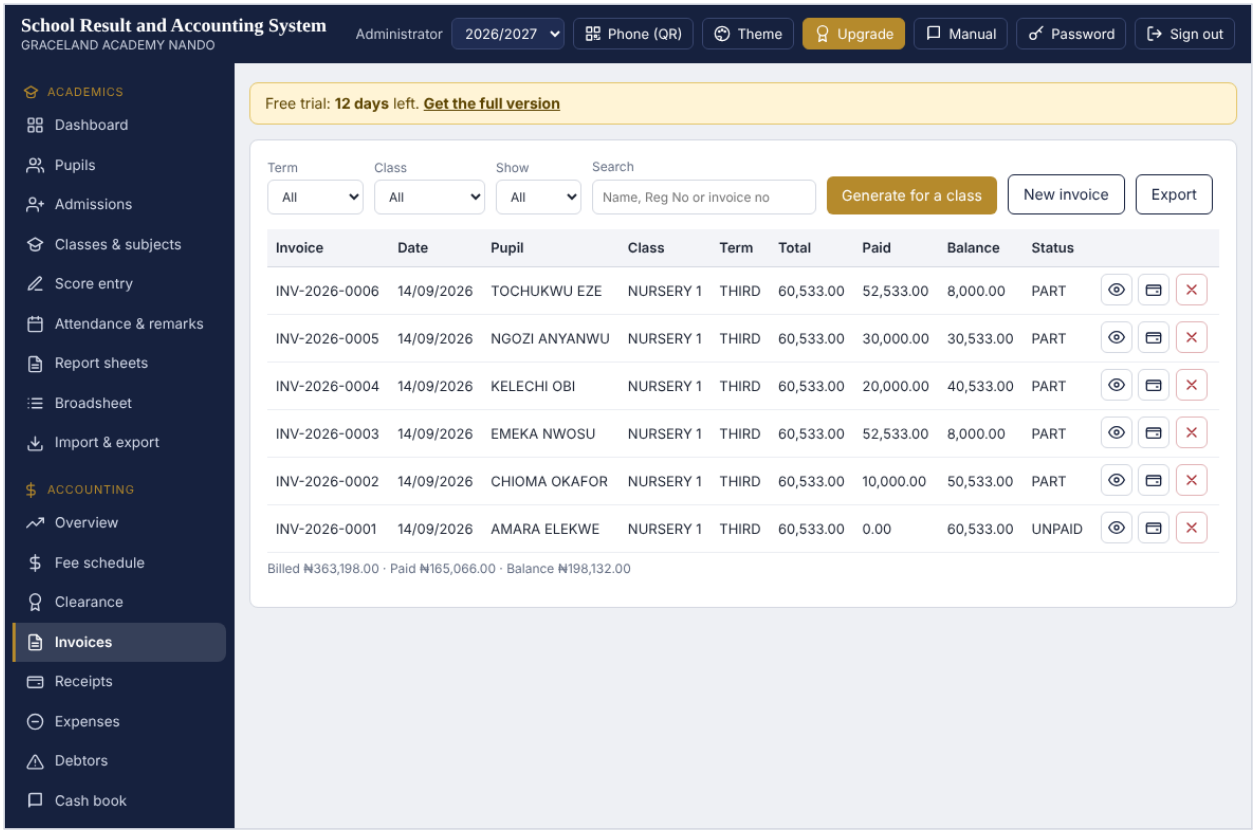

Choose a class and enter up to eight fee lines (for example TUITION FEE, EXAMINATION FEE, SPORT WEAR FEE, LESSON FEE). These lines are used to create invoices and also print as the **School bill** on that class's report sheets. **Copy to all** applies the same schedule to every class in the category.

Fee schedule for a class.

4. Invoices

At the start of each term press **Generate for a class**, choose the class, term, invoice date and due date. One invoice is created for every pupil from the fee schedule. Pupils already invoiced for that term are skipped, so it is safe to press twice. Use **New invoice** for one pupil (admission fees, balance brought forward, extra charges, discounts).

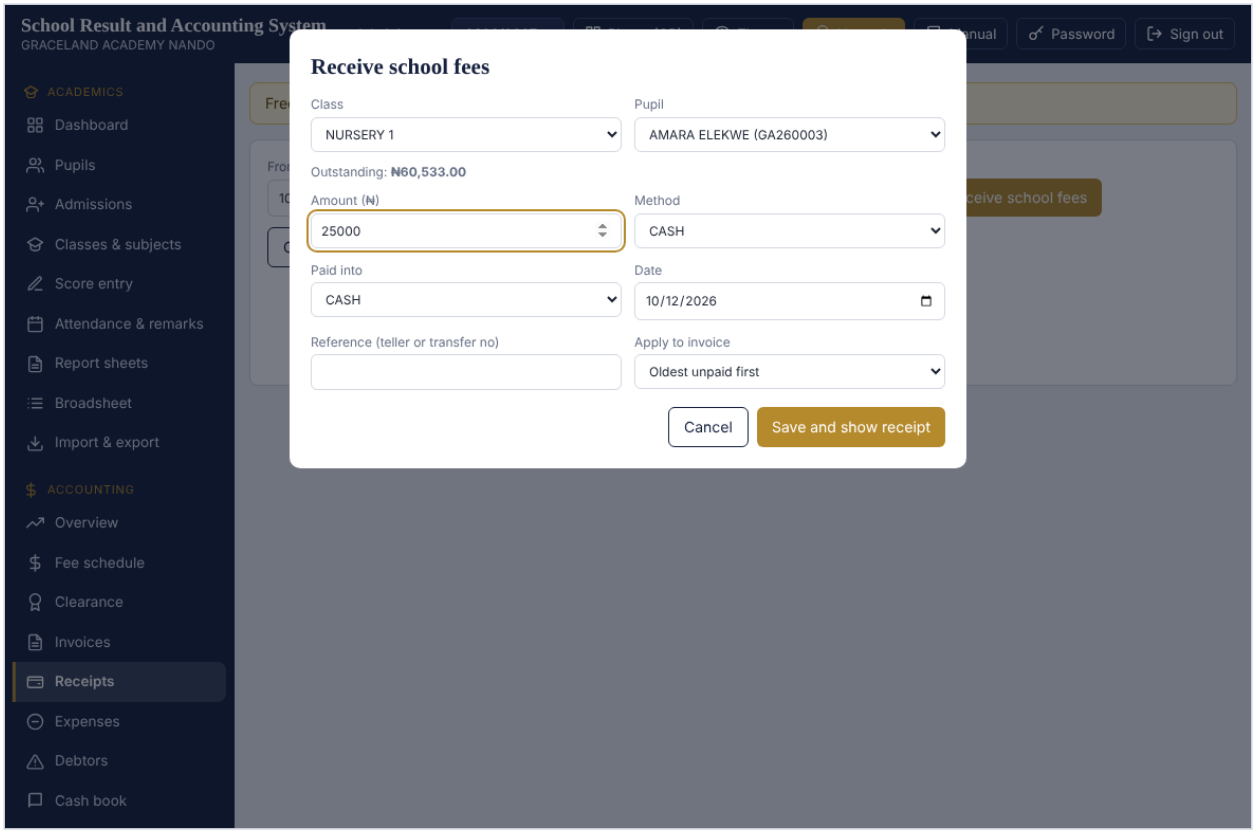

Invoice list with paid, balance and status.

Press **View** to see and print the invoice. **Void** cancels an invoice; any payment already applied to it is released.

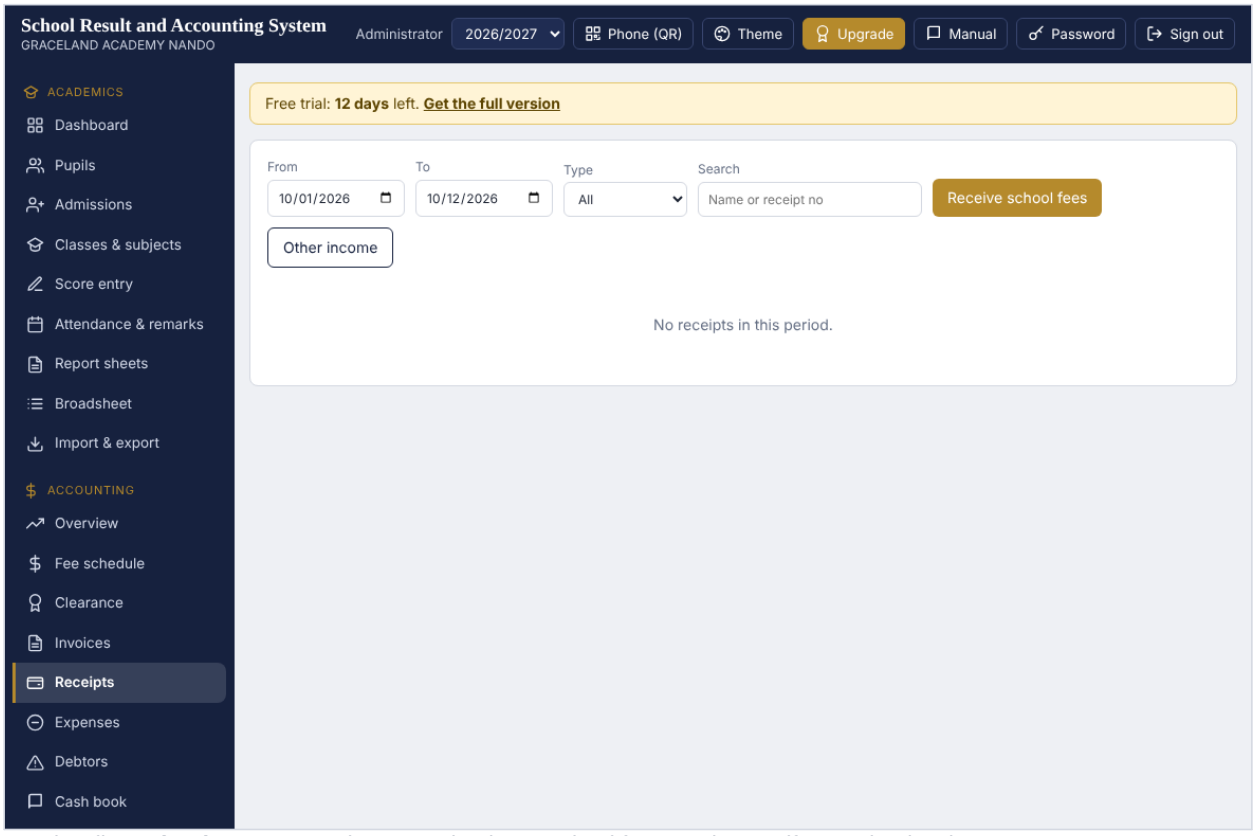

5. Receiving payments and printing receipts

1. Press **Receive payment** (on Receipts, Overview, or beside an invoice).
2. Choose the class and pupil. The outstanding balance and any credit appear.
3. Enter the amount, method (cash, transfer, POS or cheque), the account it goes into, the date and the teller or transfer reference.
4. Leave **Apply to invoice** on *Oldest unpaid first*, or choose a particular invoice.
5. Press **Save and show receipt**, then **Print or save as PDF**.

Receive payment form.

Part payments are allowed. If a parent pays more than is owed, the extra stays as **credit** and is used automatically against the next invoice. Every receipt carries a number such as RCT-2026-0001, the amount in words and the balance left.

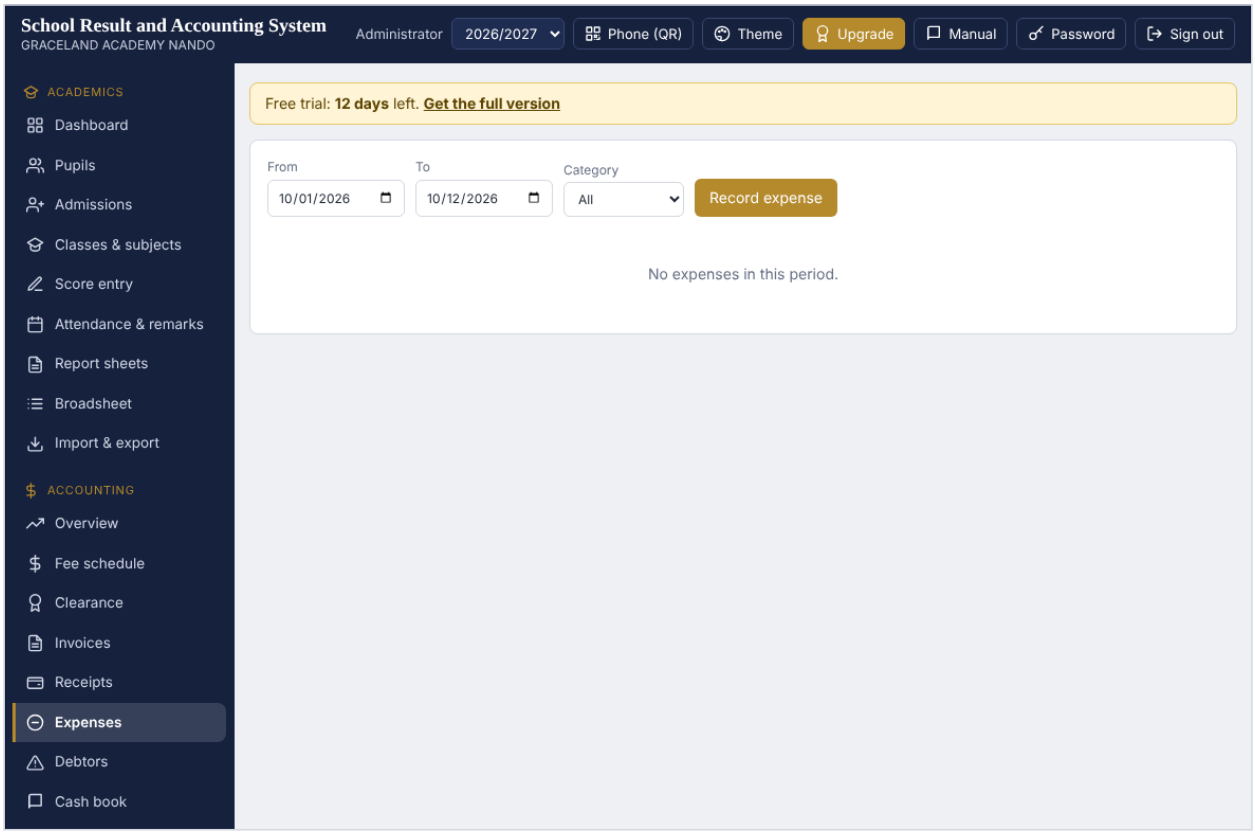

Receipts list. **Other income** records money that is not school fees, such as uniform or book sales.

A receipt entered by mistake is **voided**, never deleted. It stays on record, struck through, and no longer counts as money received.

6. Expenses

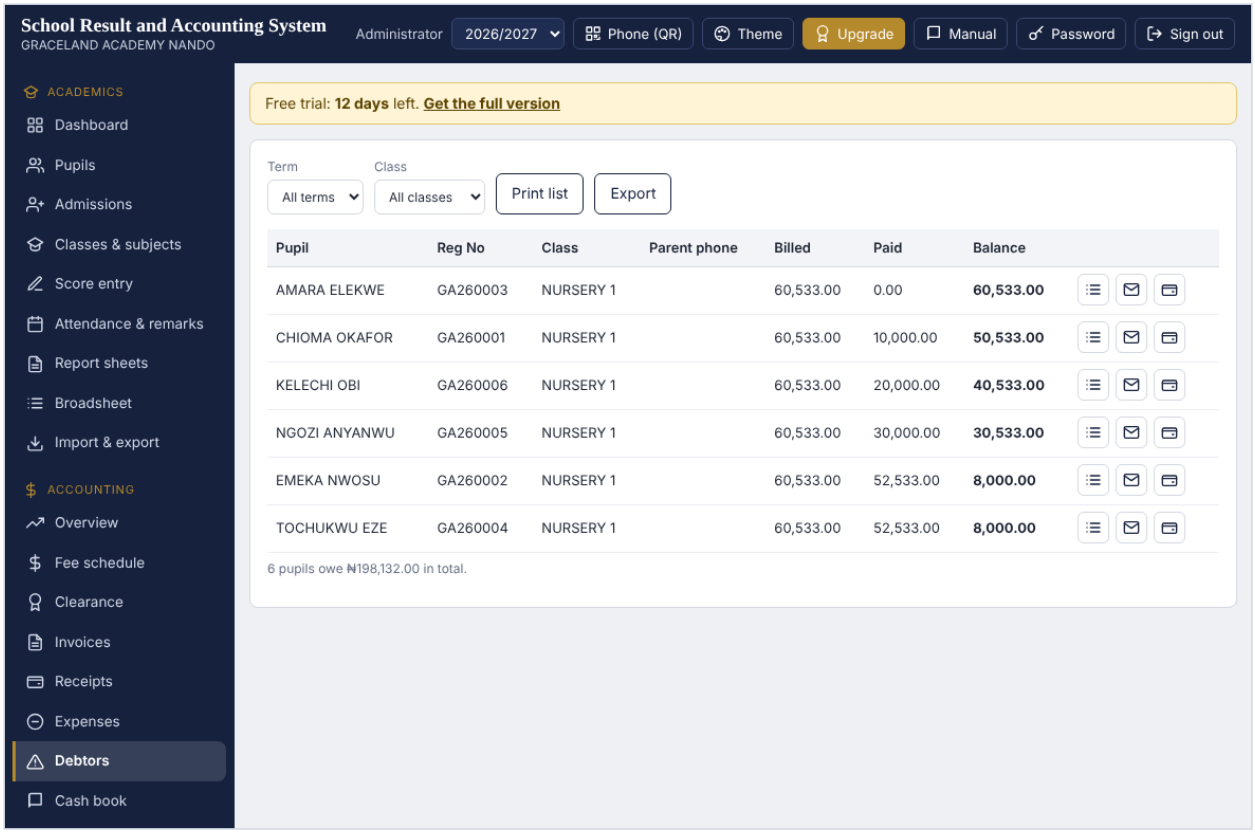

Press **Record expense**, enter the date, category (SALARIES, UTILITIES, STATIONERY and so on), who was paid, the amount and the account it came from. Each expense gets a voucher number such as PV-2026-0001.

Expenses list.

7. Debtors

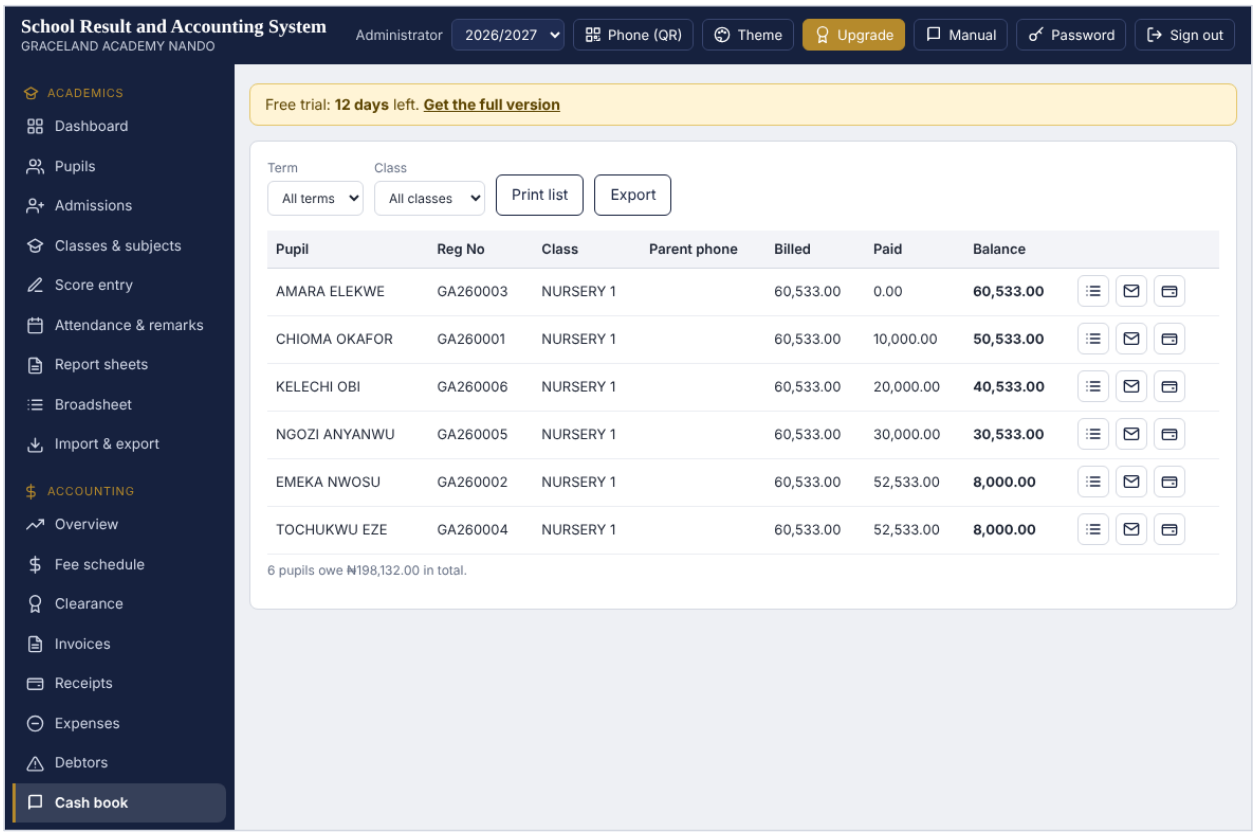

Debtors lists every pupil who owes money, with the parent's phone number (tap to call). Filter by term or class, press **Statement** for a pupil's full account, **Receive** to take a payment, or **Print list**.

Debtors list.

8. Cash book

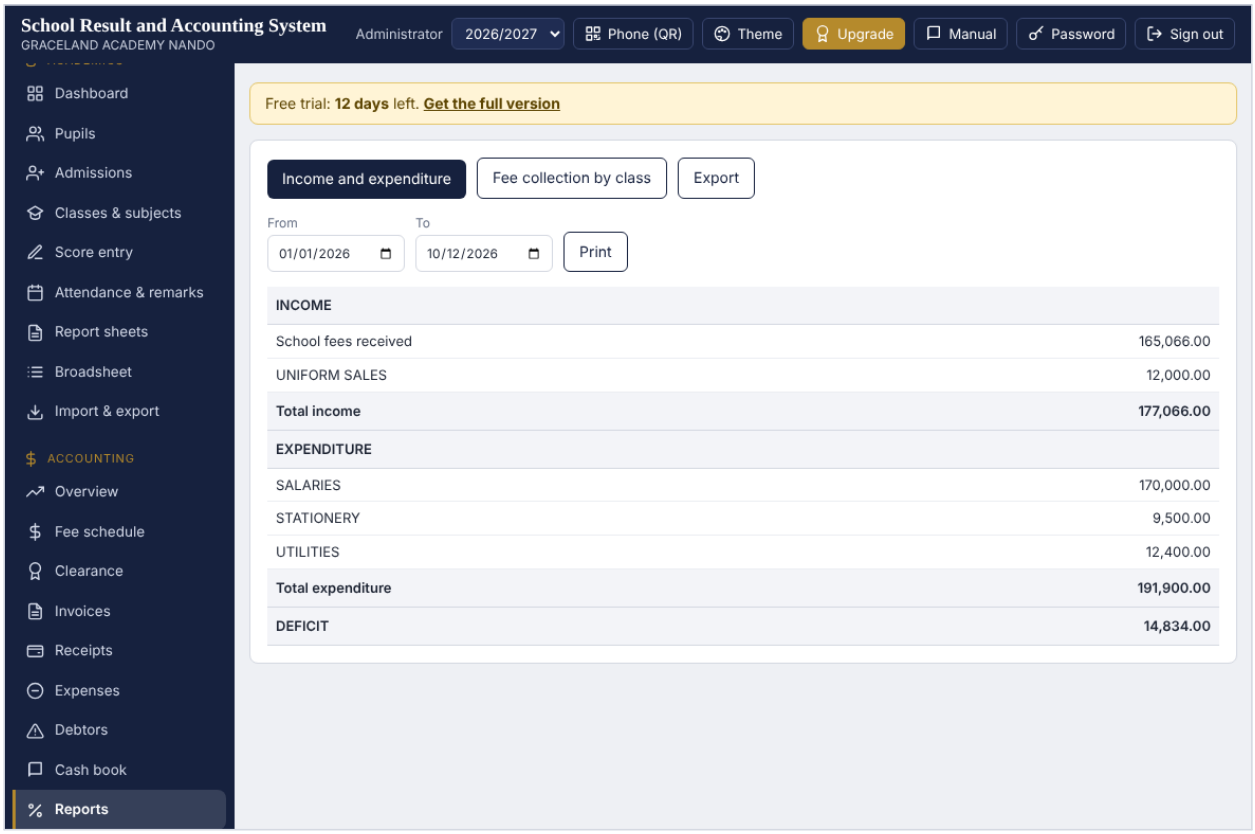

Pick an account (cash or bank) and a date range to see every receipt and expense with a running balance. The administrator can add accounts and set opening balances with **Manage accounts**.

Cash book.

9. Reports

Income and expenditure shows fees received, other income and expenses between two dates, ending in a surplus or deficit. **Fee collection by class** shows billed, collected and outstanding for each class and term.

Financial reports.

10. Good habits

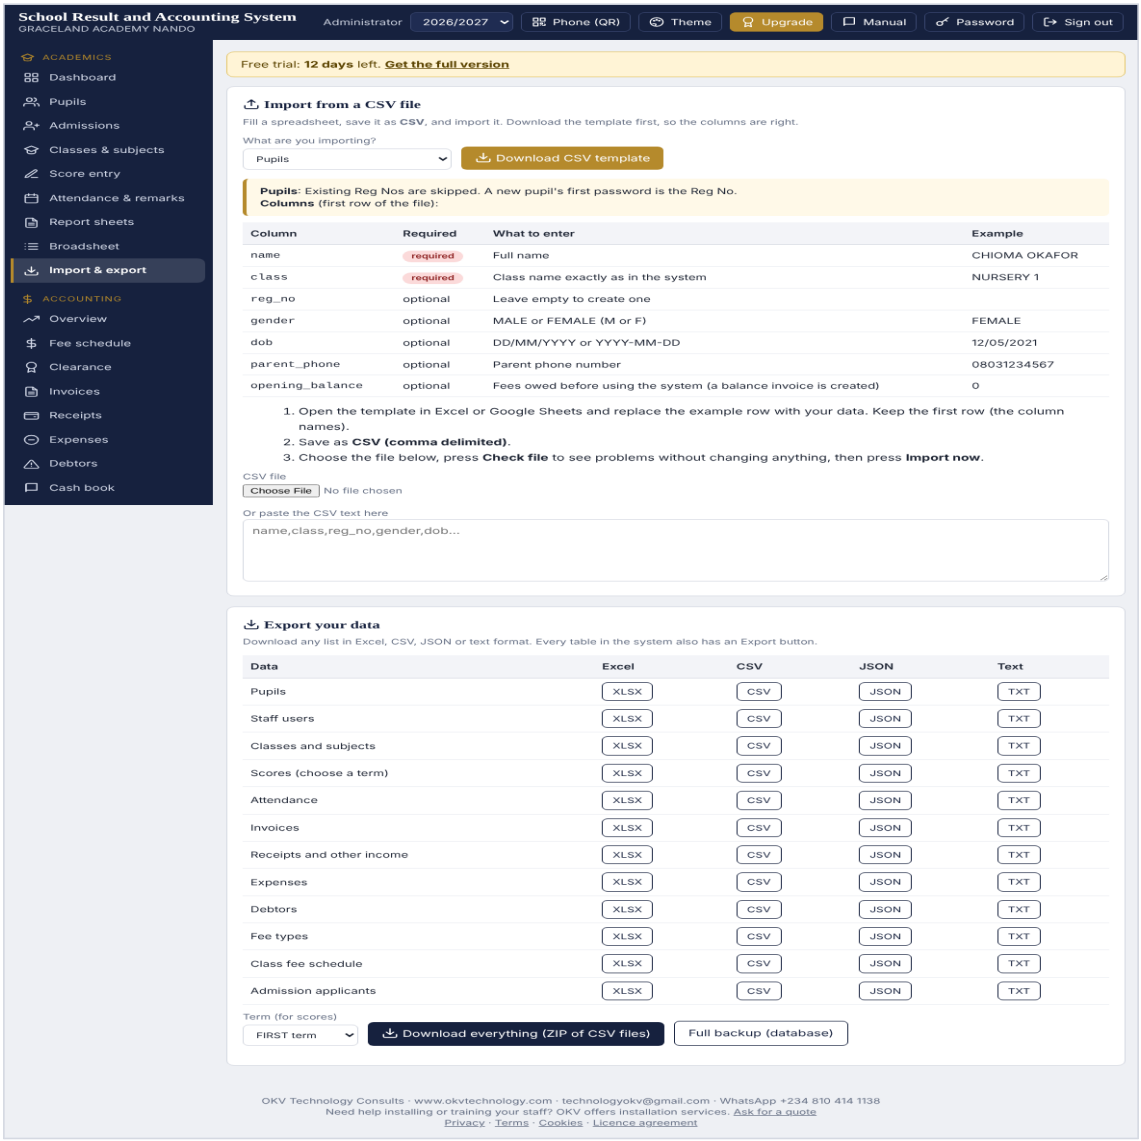

- Generate invoices on the first day of term, then record payments the same day they are received.
- Print a receipt for every payment and keep the parent's copy signed.
- Compare the cash book closing balance with the cash in the box and the bank statement every week.
- Ask the administrator to download a backup after each major entry session.

11. Common and custom fee types (new)

The fee schedule offers common school fees (tuition, examination, books, uniform, transport, PTA, development and more) and lets you add your own fee types by name and amount. A custom fee can be added to any class's schedule or to a single invoice. **Clearance** shows pupils who have paid in full, and can be printed as a clearance slip.

12. Import and export (new)

Open **Import & export** under Accounting. You can import fees, fee types, invoices, payments, expenses and other income from CSV. Press **Download CSV template** for the right columns, fill it in, press **Check file** to see problems without saving anything, then **Import now**. Every table (invoices, receipts, expenses, debtors, cash book) can be downloaded as Excel, CSV, JSON or text, so the figures can be opened in your own accounting tools.

Import and export centre.

13. Phones and themes (new)

The system fits phones and tablets on the school Wi-Fi. Scan the **Phone (QR)** code shown by the administrator; it only opens the address and you sign in with your own login. **Theme** changes colours for you.
